

HEALTHY KIDS PEDIATRICS

Office Policy on Prescription Requests

At Healthy Kids Pediatrics, we are dedicated to providing your child with the best medical care available. In order to do that, we will need your assistance when requesting prescriptions to ensure that they are filled in a timely manner.

- a. Typically, a child must be seen before a medication is prescribed for the first time. Exceptions are left up to the doctor's discretion.
- b. Refills – Please allow **48 hours** for the prescription to be filled after it is requested by yourself or the pharmacy.
- c. Parents must pick up the prescription for ADD/ADHD and sign a log. Triplicate prescriptions expire 21 days from the time they are written. An office visit may be required before a refill request will be honored.
- d. In the event that a prescription for ADD/ADHD must be rewritten, a \$25 fee will be collected when the new prescription is picked up and the outdated one collected.

If you have questions or concerns with these policies, please feel free to contact our office.
